THE BRANDING MUSE

Party Goers Checklist

1. ADJUST YOUR SETTINGS

You can manage the privacy of your status updates, photos and information by simply adjusting the setings.

If your instagram has questionable pictures, don't take any risks and just make it private.
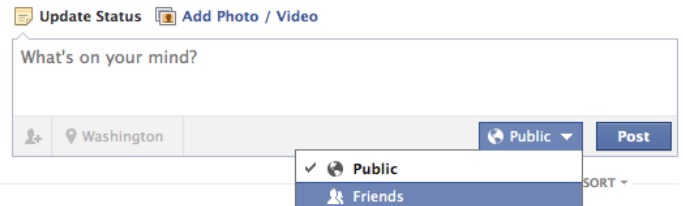

2. THINK BEFORE YOU POST

What's inappropriate? Scandalous clothing or nudity, raunchy dancing, excessive intoxication, public displays of affection and anything else that you would be embarrassed for an employer to see.

3. CHECK YOUR STATUS AND TWEETS

What your tweets and status updates should not say: Anything referring to drugs, passing out, blacking out, one night stands, walk of shame, hangovers, how little your outfit is etc. If you think it might be inappropriate for an employer to see, it probably is.
